

## American Aero FTW

A New Approach to Private Aviation

**A**merican Aero FTW delivers a truly exceptional FBO experience for arriving and departing visitors at Meacham International Airport in Fort Worth, Texas.

It begins with a stunning new facility, spacious lounges, state-of-the-art hangars, and incomparable service and amenities, all designed to meet the discriminating needs of today's private aviation travelers and pilots.

KFTW's premier FBO also offers competitive fuel prices, the largest open ramp on the field (11 acres), and ground support capable of servicing any size business jet.

**Reimagining service.** Located in the heart of Meacham's newly renovated terminal, the world-class, 8,400-square-foot FBO has a Ritz-Carlton certified customer service team dedicated to exceptional customer care.

**Redefining safety.** American Aero FTW leads the industry in ground handling safety. With a NATA Safety 1st trained line team, it was the first IS-BAH accredited FBO in the U.S. in 2015. This year, American Aero also became the first Stage II IS-BAH accredited FBO east of the Rockies.
